poultry and eggs

FPE 1-73
April 1973

U.S. TRADE IN POULTRY AND EGGS, 1972

Summary

U.S. exports of poultry and poultry products in 1972 were valued at \$85.7 million, an increase of 15 percent over 1971. Exports of turkey meat, both whole birds and parts, showed the largest rate of increase of almost 60 percent in total value to \$15 million. Exports of chicken meat, including broilers, totaled \$25.3 million, only slightly below the 1971 level, while exports of other poultry meat items were valued at \$7.8 million, half again as much as in 1971.

Exports of eggs and egg products, at \$17 million, were 27 percent larger than in 1971. Hatching eggs, valued at \$12.2 million, is the principal item in this category, but exports of dried eggs increased almost two and one-half times to \$3 million.

U.S. sales of live poultry were valued at \$20.7 million in 1972, compared with \$20.9 million in 1971. Exports of baby chicks, mainly breeding stock, totaled \$18.4 million, down 5 percent from 1971, but this was largely offset by larger exports of turkey poult and other live poultry.

U.S. sales to the European Community (EC) in 1972 increased 18 percent in value to \$13.9 million. Of this total, \$10.6 million was poultry meat, \$1.8 million eggs and egg products, and \$1.5 million live poultry. Turkey parts, value at \$7 million, were up 34 percent to the EC, going mainly to West Germany, our largest single market for poultry meat. Sales in 1972 to Switzerland \$3.6 million, and the United Kingdom \$3.4 million, were largely poultry meat, but included substantial quantities of dried eggs.

Total sales to Japan and Hong Kong, our major Far East markets, were \$10.1 million and \$4.9 million, respectively. Sales to Japan included \$6.3 million of poultry meat, mainly chicken parts, plus important quantities of baby chicks and egg products. Exports to Hong Kong were almost exclusively poultry meat.

The Caribbean area continues to expand as a major market for U.S. poultry and poultry products.

In 1972, U.S. sales reached \$14.9 million, up 8 percent from 1971. Approximately two-thirds of the 1972 value was in poultry meat with the balance mostly hatching eggs and baby chicks. Major Caribbean markets in 1972 were Jamaica \$3.1 million, Netherlands Antilles \$2.6 million, Leeward and Windward Islands \$2.1 million, Barbados \$1.9 million, Dominican Republic \$1.8 million, and Trinidad and Tobago \$1.1 million.

Imports of poultry and poultry products in 1972 totaled \$4.5 million in value, substantially below the \$8.1 million imported in 1971. Most of the decrease in 1972 was in shell eggs and dried eggs. Imports of chicken shell eggs, largely from Canada, dropped from \$1.6 million in 1971 to \$377,000. Dried egg imports in 1972 were negligible, compared with \$1 million in 1971. Poultry meat imports in 1972 were valued at \$1.1 million, slightly less than in 1971. Imports of live poultry, predominantly baby chicks, totaled \$1.7 million in value, compared with \$2.8 million in 1971.

Exports

Poultry Meat. U.S. exports of poultry meat in 1972 totaled 155.2 million pounds, up 11 percent from 1971, and were valued at \$48 million, up 19 percent. Fresh and frozen poultry meat totaled 148.6 million pounds valued at \$45.8 million in 1972. The balance of U.S. poultry meat exports in 1972 was canned items.

Sales of fresh and frozen poultry meat to the EC-Six in 1972 totaled 26.1 million pounds valued at \$9.8 million, up 14 percent in volume and 19 percent in value from corresponding data for 1971. Of the total volume moving to the EC in 1972, 78 percent, or 20.4 million pounds, was turkey meat (18 million pounds in parts), with West Germany accounting for 15.9 million pounds (14.5 million in parts).

Exports of fresh and frozen poultry meat to Hong Kong in 1972 totaled 21 million pounds valued at \$4.9

million, up from 20.3 million pounds and \$4.3 million in 1971. About 80 percent of the total product going to Hong Kong is chicken parts, mainly wings. Mainland China and Denmark, aided by State trading and subsidized pricing, are principal competitors of the United States in this market.

U.S. poultry meat exports to Japan were 17.5 million pounds valued at \$6.3 million in 1972, about the same as 1971. The U.S. share of the Japanese market in 1972 should reach 30 percent, 5 percent more than in 1971. Mainland China, Denmark, Eastern Bloc countries, particularly Bulgaria and Hungary, and Canada, are other major suppliers.

Poultry meat exports to the Caribbean (and Bermuda) in 1972 totaled 41.7 million pounds, valued at \$9.9 million, about the same volume as in 1971 but up 11 percent in value. Chicken parts, at 32.4 million pounds, continues to be the principal export item to this area, but significant increases in 1972 occurred in turkey meat sales—up 41 percent in volume and 45 percent in value—and in other poultry meat products, fresh or frozen, which more than doubled in volume to 2.1 million pounds valued at \$854,000. Principal destinations in the Caribbean in 1972 were: Jamaica, 14.1 million pounds; Leeward and Windward Islands, 9.2 million; Barbados, 6.9 million; and the Netherlands Antilles, 6.6 million pounds.

A breakdown of fresh or frozen poultry meat exports shows a marked increase in sales of turkey meat in 1972 over the preceding year—accounting for 24 percent of the total export volume, compared with 17 percent in 1971. Chicken parts made up 50 percent of the 1972 total volume; turkey parts, 17 percent; whole young chickens, 14 percent; whole turkeys, 7 percent; and other poultry meat products, fresh and frozen, 10 percent.

Switzerland in 1972 was the largest single market for whole young chickens, accounting for 39 percent of the 20.2 million pounds shipped. Other destinations taking more than a million pounds were: Canada, 1.8 million; Mexico, 1.7 million; Jamaica, 1.3 million; and Greece, 1.2 million pounds. Switzerland also was the largest market for U.S. exports of whole fowl—65 percent of total exports of 3.2 million pounds.

Exports of chicken parts totaled 73.9 million pounds in 1972, 5 percent below the 1971 volume. Principal 1972 destinations were Hong Kong, 16.6 million pounds and Japan, 16 million. Of the balance, 32.4 million pounds went to Caribbean markets.

U.S. whole turkey exports totaled 11.4 million pounds in 1972, up 89 percent from 1971. Canada was the largest single market last year with 3.5 million pounds followed by West Germany with 1.3 million

pounds. While no other country's imports of whole turkeys reached 1 million pounds, whole U.S. turkeys increased in popularity in many countries throughout the world.

U.S. exports of turkey parts totaled 25 million pounds in 1972, up nearly 50 percent from 1971 sales. Sales to the EC were 18 million pounds, with West Germany alone taking 14.5 million pounds. Other European countries took 3.2 million pounds, with 2 million pounds going to the United Kingdom—twice its 1971 volume. Sales to Canada increased sharply to 1.3 million pounds from 110,000 pounds in 1971, while exports to Hong Kong more than doubled to 1.2 million pounds.

U.S. exports of poultry meat, fresh or frozen, not elsewhere classified (n.e.c.), totaled 5.2 million pounds in 1972 and went principally to Hong Kong, Canada, and the Netherlands Antilles.

West Germany, with 3.9 million pounds, was by far the most important market for poultry liver, with other EC countries and Hong Kong taking most of the balance of the 1972 exports total of 4.7 million pounds.

Exports of poultry specialty items in 1972 totaling 5 million pounds went principally to Canada 2.4 million pounds, the United Kingdom 1.2 million pounds, Venezuela 420,000 pounds, West Germany 206,000 pounds, and the Caribbean countries 275,000 pounds.

Canned poultry meat exports in 1972 totaled 6.6 million pounds valued at \$2.3 million, up 80 percent in volume and 123 percent in value over 1971. Sales went principally to Canada 2.3 million pounds, West Germany 2.4 million pounds, and Trust Territory of the Pacific Islands 772,000 pounds.

Eggs and Egg Products. Exports of eggs and egg products in 1972 were valued at \$17 million, well above the 1971 export value of \$13.4 million. Shell egg exports totaled 14.9 million dozen in 1972, an increase of 16 percent from 1971. Practically all of the increase was in market (consumption) eggs, with shipments to Canada in 1972 rising to 1.8 million dozen, compared with 302,000 dozen in 1971. Substantially larger quantities also went to Bermuda, Jamaica, Mexico, and Spain in 1972 than in the previous year.

Exports of hatching eggs in 1972 totaled 11.8 million dozen, slightly above the 1971 volume. Canada, the Dominican Republic, and Jamaica were the principal destinations in North America. Exports to South America, mainly to Ecuador, Guyana, Surinam, and Argentina, totaled 1.1 million dozen. Most of the balance of 1972 exports went to the EC countries.

Exports of dried eggs rose sharply in 1972 to 2.7 million pounds, about two and one-half times the 1971 total. Exports to principal 1972 destinations, with comparable 1971 volumes in parenthesis, were as follows (in 1,000 pounds): EC, 497 (93); United Kingdom, 853 (114); Switzerland, 447 (347); Austria, 200 (5); and Japan, 353 (17).

Exports of frozen and otherwise preserved eggs totaled 1.5 million pounds in 1972, compared with only 131,000 pounds in 1971 with sharp increases in exports to Japan and Italy.

Low egg prices during most of 1972 was a basic factor in moving larger quantities of market eggs and egg products into export channels.

Live Poultry. Exports of baby chicks in 1972 totaled 30.5 million head valued at \$18.4 million. This was an increase of 6 percent from 1971 in numbers exported. Value of exports, however, was down 5 percent due to a larger proportion of the 1972 shipments being lower priced nonbreeding chicks. Canada, the Bahamas, Nicaragua, Mexico, Dominican Republic, and Honduras accounted for 93 percent of the 21.3 million going to North America. Shipments to South America, at 3.5 million, were about the same as in 1971. Exports to European destinations, 2 million, and Japan 1.5 million, were below 1971 levels.

Turkey poult exports increased to 976,000 head, almost double 1971 shipments, due mainly to larger shipments to Canada and France.

Exports of other live poultry in 1972, at 4.1 million head, were more than twice the 1971 total, due to larger exports to Canada.

Imports

Imports of poultry and poultry products in 1972 totaled \$4.5 million, 44 percent below the value of

imports in 1971. Most of the decrease was due to reduced imports of shell eggs from Canada and Mexico and to lower dried egg imports which were negligible in 1972. Total imports of shell eggs in 1972 were 1.8 million dozen, compared with 5.7 million dozen in 1971.

Poultry meat imports, largely from Canada, totaled just under 1 million pounds in 1972 valued at \$1.1 million, slightly less than comparable totals for 1971.

Imports of baby chicks from Canada were 3.3 million in number in 1972, compared with 3.4 million in 1971. Imports of other live poultry, almost all from Canada, totaled 250,000 pounds, sharply down from the 3.3 million pounds imported in 1971.

Outlook

The value of U.S. exports of poultry and poultry products during the first 2 months of 1973, at \$14.2 million, was 22 percent above the January-February 1971 export value. Exports of all meat categories are on the plus side with turkey meat exports continuing to lead the way. While market access restrictions, such as the import levy system of the enlarged EC, subsidized exports and State trading practices of competing countries, and nontariff barriers will continue to challenge the U.S. poultry exporters, conditions appear favorable for a continuing high level of exports in 1973.

World red meat prices are likely to remain well above average 1972 levels, encouraging greater consumption of poultry meat. With feed costs expected to be high in all countries, the efficiency of the U.S. poultry industry, combined with devaluation and an effective export marketing program, should move larger volumes of U.S. poultry products into world marketplaces.

WORLD TRADE IN POULTRY MEAT UP AGAIN IN 1972; EGGS DOWN SLIGHTLY

Poultry Meat

29
TRADE. Imports of poultry meat into the eight major world import markets increased in 1972 for the sixth consecutive year, totaling 865.4 million pounds, up 7 percent from 1971. Decreased imports by the United Kingdom and Greece were offset by greater imports by the other importing countries, particularly by West Germany which alone accounted for 71 percent of total imports by this group.

West Germany's imports of poultry meat in 1972 totaled 614.4 million pounds, about 48.3 million above 1971. This increase reflects mainly increased shipments from the five other members of the European Community (EC) (up by 42.4 million pounds). Imports from Hungary increased slightly while those from Czechoslovakia declined. Netherlands remained the largest single supplier. Shipments from the United States in 1972 were 0.9 million pounds above a year earlier.

Imports by Switzerland in 1972 increased by 8 percent to 56.4 million pounds, up 4 million pounds from 1971. Greater imports from France, the United States, and Hungary more than compensated for smaller shipments from Denmark, Poland, and other traditional suppliers.

The United Kingdom imported 22.6 million pounds of poultry meat, 7 percent less than in 1971. Imports from Denmark declined 8 million pounds while those from Ireland rose by 5.9 million. These two countries accounted for 82 percent of total U.K. poultry meat imports in 1972.

Austria's imports, at 30.7 million pounds, were 3.9 million pounds above a year earlier, with Hungary the largest single source accounting for 11.9 million pounds. Subsidized exports from West Germany to Austria totaled 4.7 million pounds, up 38 percent from 1971. Imports from Denmark declined by 31 percent, to 5.3 million pounds.

Imports by Greece declined from 5.5 million

pounds to 2.9 million pounds, reflecting smaller shipments from the United States and France.

Japan's imports of poultry meat increased by 8 percent to 64.6 million pounds. The United States was the largest supplier, followed by the Peoples' Republic of China, both of which increased shipments to Japan in 1972. Imports from Bulgaria and Hungary increased, while those from Canada and Denmark decreased.

Hong Kong imported 66.8 million pounds of poultry meat in 1972, 5 percent more than a year earlier. The Peoples' Republic of China increased shipments to this market by 4.7 million pounds and remained the largest supplier. Imports from the United States increased a small amount, while those from Canada and West Germany declined.

Singapore's imports were up slightly, with Denmark the most important source, followed by the Netherlands.

In 1972, the Netherlands accounted for 457.3 million pounds, or 53 percent of total shipments of poultry meat to the major import markets, a smaller portion than in 1971 (55 percent). The United States ranked second with exports to these markets totaling 71.5 million pounds, but the world total of U.S. poultry meat exports was 157 million pounds. Denmark's total exports declined in 1972. Bulgaria, Czechoslovakia, Hungary and Poland all increased poultry meat exports which in total increased by 5 percent. Major destinations were Austria, West Germany, Switzerland, and Japan. The Peoples' Republic of China increased exports in 1972 by 33 percent, with shipments to only two major destinations, Hong Kong and Japan.

PRODUCTION. Poultry meat output in 1972 in 17 leading countries reached a record level of 21.5 billion pounds, 6 percent above 1971. Increases were registered in all countries except Belgium-Luxembourg and West Germany.

The United States increased output, mainly broilers, to 12 billion pounds, 5 percent above 1971. Total chicken meat production increased by 4 percent between the 2 years, and turkey meat by 7 percent. Canadian poultry meat production expanded by 10 percent.

European production increased by about 8 percent in 1972, from 7.6 billion pounds to over 8.1 billion pounds in the leading producing countries. Italy, France, and the United Kingdom remained the leading producers, registering increases of from 9 to 15 percent. In the Netherlands and Denmark, output grew by 2 percent and 5 percent, respectively.

Japan's poultry meat production continued to increase, reaching almost 1.4 billion pounds in 1972, up 16 percent from 1971, and more than double 1967 production.

Eggs

TRADE. Imports of shell eggs into eight leading import markets in 1972 declined by 8 million dozen to 393.6 million dozen, a decrease of 2 percent. West Germany remained by far the largest import market, taking 51 percent of total imports. In 1972, West Germany's egg imports increased by 7.1 million dozen. Imports by Canada, Switzerland, and Austria also rose. These increases were more than offset by a large decrease in imports by the United Kingdom (down 10.9 million dozen) and smaller reductions by Hong Kong, France, and Italy.

Shipments to West Germany from the Netherlands increased substantially and those from Belgium-Luxembourg were up to a lesser extent. Imports from Czechoslovakia declined. Imports by France, mainly from other EC members, declined by 13 percent. Italy reduced shell egg imports slightly, with greater imports from Eastern Europe partially compensating for smaller imports from Western Europe, notably from

Belgium-Luxembourg. The Peoples' Republic of China continued to supply the bulk of imports by Hong Kong.

Imports of egg products declined by 17.2 million pounds in 1972, to 142.5 million pounds. Substantially reduced imports by the United Kingdom accounted for most of this decline. Australia was the leading exporter of egg products, followed by the Netherlands and the Peoples' Republic of China.

PRODUCTION. Egg production in the 36 countries continued to trend upward and in 1972 reached an estimated 294.8 billion eggs. This was 2 percent above 1971 and 17 percent above 1967. Increased output occurred in all but 11 countries. U.S. production declined slightly in 1972 to 69.5 billion eggs. Production in the six countries of the EC increased by 3 percent, to 47.4 billion eggs. In Eastern Europe, 1972 output increased by 4 percent and in the USSR by 7 percent.

Outlook

The outlook for 1973 is influenced by the expansion of the EC from six to nine countries, including Denmark which now has better access to the West German market. Higher feed costs pushed production costs of poultry meat upward. However, poultry meat prices compare favorably to red meat prices which have tended to rise even more sharply, so that demand for poultry meat, as well as consumption, rose in most foreign markets during early 1973. Preliminary data indicate that poultry meat production rose in Japan and throughout Western Europe, except in Greece. However, U.S. poultry meat production in 1973 probably will not exceed that of a year earlier. World trade in poultry meat is expected to increase.

Production and trade in eggs are expected to expand in view of the strong demand for high-protein foods.
